Alexander ‘AJ’ Fraser

Dependable, quick to adapt, with years of experience keeping things organized and moving smoothly. A strong communicator who has worked with teams large and small, both in person and remotely. Curious by nature, enjoys figuring out how things work and loves to improve them. Comfortable juggling multiple tasks and staying focused under pressure.

EXPERIENCE

The Wandering Band - Remote
Embedded Quality Assurance Tester

Part Time, August 2022 - *September 2024*

Tested games for bugs, usability and game player experience. Games tested went into two shipped titles. Used Atlassian JIRA to log issues, often including video and or step by step notes. Ran test plans to catch problems early while checking that new features worked as intended. Worked closely with the development team to ensure priorities were met for game delivery.

Cambria Toronto Fabshop - Bolton, Ontario
Lead Polishing Operator

April 2010 - December 2023

Proficiently cross trained in Packaging, Yukon II Bridge Saw Operation, Lamination Assembly, Breton NC 260 CNC Operation and used AlphaCam to generate CNC Programs. Oversaw the team’s workflow and training new operators. Focus on the team's safety processes, as well as expectations and ability to deliver at the highest level. Helped streamline the production process by using data to improve timeline and output across the manufacturing process.

EDUCATION

Advanced Diploma, Game Development
Centennial College, Toronto, On.

2024 - *Present (2027)*

- Developing a diverse skill set in project management, team collaboration, and problem-solving through practical applications in game production with Unity.
- Learned to approach problems creatively, communicate clearly, and follow through from planning to delivery
- Game Development learned and studied through the lens of the Unity Engine
